Both the women and the those days. The modern man does not admire the fainting woman, neither does he marry her. If by chance he does, he is only a man, and lives to regret it. There is no reason why any woman should be a fainting woman. General bodily weakness and nervousness in women are due to weakness or disease of the delicate, special organs of the sex. Dr. Pierce's Favorite Prescription is a scientific and unfailing remedy for all disorders of this description. It imparts health and strength to the sensitive and susceptible organs upon which a woman's general health is largely dependent. It quiets and tones up the nerves, restores the vigor of youth, rounds out the emaciated form, imparts the glow of health to the complexion and transforms weak, sickly, nervous invalids into new, healthy, happy women. It fits for wifehood and motherhood.
